

GABRIEL GUERRA

Software Developer · Python/Django · TypeScript/React Native

Santiago, Chile · gguerra.code@gmail.com · [linkedin.com/in/gguerra-code](https://www.linkedin.com/in/gguerra-code) · github.com/gaborgr · gaborgr.github.io
Chilean citizenship · Spanish (native) · Intermediate English (B2, self-assessed)

PROFILE

Product-oriented software developer with professional experience on a production Django product and hands-on experience building products end to end. I have released ten Android apps and six live web products. I use AI tools daily to move faster, while understanding the changes, reviewing the code, and owning the result. Before software, I spent nearly 18 years in audit, accounting, and finance, progressing from Auditor to Controller/Head of Accounting.

EXPERIENCE

Backend Developer · Syzlab

Dec 2025 – present

Santiago, Chile (hybrid) · Consumer dating platform · Django, JavaScript, HTMX, WebSockets, AWS S3, Docker

- Build and maintain features across backend, frontend, data models, testing, deployment, and production troubleshooting.
- Implemented an A/B testing system, internal survey tools, and support management workflows.
- Built a reported-image control using SHA-256 and pHash to detect matches and flag suspicious profiles.
- Implemented Ghost Mode and other privacy and user-experience improvements in an existing codebase.
- Work in English and use AI-assisted development daily, reviewing each change before integration.

Founder & Software Developer · Teddy Code LLC

Sep 2025 – present

React Native, Expo, Next.js, TypeScript, Supabase (PostgreSQL, Auth, Edge Functions), EAS cloud builds, AI-assisted development (Claude Code)

- **Playro** ([Google Play](#) · playro.app). Social matchmaking app for gamers. Full product cycle: definition, UI design, mobile app, Supabase backend, push notifications, store assets, production release.
- **Stusher** ([Google Play](#) · stusher.app). Streaming recommendation app: personalized movie and series recommendations in 30 seconds. Serverless API integrations via Edge Functions (no API keys in the client bundle).
- **Woggli** ([Google Play](#)). Peer to peer marketplace and social network for the world Scout movement: collectors trade badges, neckerchiefs and woggles. Follow graph with friendship derived automatically, realtime chat and shipment tracking, reporting and moderation, with every critical transition behind a Postgres RPC instead of a direct table write. Released in 5 languages.
- **Seven micro-apps shipped solo to Google Play in 2026**: [Decibra](#) (sound meter), [Magniyo](#) (magnifier), [Osito](#) (baby tracker), [Arrullo](#) (sleep sounds), [AviCalma](#) (flight anxiety), [Tiltza](#) (level), [Wheelza](#) (decision wheel). All offline-first, on one shared release pipeline.
- **Six web products, all Next.js**: **Hallazgo** (hallazgo.app), a daily magazine fed by an automated pipeline I built: an AI agent runs headlessly and publishes straight to the database, no deploy per article; **QualiPath** (qualipath.co), a decision engine for professional qualification recognition abroad, 83 verified routes across 18 destinations; **QueCalifico** (quecalifico.com), a financial eligibility engine covering 48 institutions; **FadeChats** (fadechats.app), disposable peer-to-peer chat over WebRTC; **ChannelBerry** (channelberry.com), an editorial guide to YouTube with 93 hand-reviewed channels published in 5 languages, built on a git-versioned catalog plus the YouTube Data API with ISR caching; and **Playro Web** (web.playro.app).

Earlier experience: Audit, Accounting & Finance

2006 – 2024

- **Controller / Head of Accounting, GL Events Chile (2022–2024)**; previously General Accountant at Edelcta and Accounting Team Lead at Bupa/Cruz Blanca.
- Earlier roles include Finance Analyst at CMPC, Unilever, and PDVSA Industrial; General Accountant at Tavelca; and Auditor at UHY International and KPMG.

TECHNICAL SKILLS

Backend:	Python, Django, REST APIs, WebSockets, PostgreSQL, Redis, SQLite
Frontend:	JavaScript, TypeScript, HTMX, Tailwind CSS, HTML/CSS, i18n/SEO
Mobile:	React Native, Expo, Expo Router, Zustand, React Query
Infra:	Docker, AWS S3, Supabase, Vercel, Cloudflare, Git/GitHub, EAS CI/CD, Stripe
AI-assisted dev:	Claude Code as daily driver (plan first, small diffs, every diff reviewed), MCP servers, Claude API in production pipelines
Product:	A/B testing, analytics, Google Play publishing, landing/conversion design

EDUCATION & LANGUAGES

- **Bachelor's Degree in Public Accounting** (Licenciatura en Contaduría Pública), Universidad Nacional Experimental de Guayana (UNEG), Venezuela, 2006
- Completed Harvard CS50x through edX (no verified certificate), plus self-directed software education
